

### COFFS HARBOUR

**Envirowalk** has been supplying our FRP **EnviroGrate** & **EnviroTreads** for countless projects throughout this amazing part of the NSW coast since 2008. The following Photos reveal just a few of these.

To meet the need for a combination of P5 anti-slip and comfort for wet bare feet Envirowalk Mini-Mesh and Micro Mesh panels and **EnviroTreads** were used for beach access and surf lifesaver viewing platforms. The fine barefoot friendly grit surface also reduces the risk of abrasions should a child run and fall on it.

**EnviroGrate** 38x38 grid has been used for most forest type locations such as the Coastal bush walk at right.

To create maximum longevity for facilities, all Envirowalk FRP **EnviroGrate** & **EnviroTreads** are manufactured using only premium grade, unblended Type I (Iso) resin with ATH filler, maximum anti-UV, E-Glass fibres and fine grit P5 rated anti-slip surface.

Micro Mini-Mesh: Coffs Harbour

Muttonbird Island, Coffs Harbour

Coastal bush walk  
Coffs Harbour

Coffs Harbour City Council continue to buy and trust Envirowalk high quality FRP products.

### Envirowalk PRODUCTS USED:
