

MERIMBULA 2020

Envirowalk was contracted to supply our FRP Mini **EnviroMesh** panels and Mini **EnviroMesh EnviroTread** Landing panels for this project in beautiful Merimbula on the Sapphire Coast of NSW. All Mini Mesh and **EnviroTread** panels are manufactured using only premium grade, unblended Type I (Iso) resin with FR, best quality E-Glass fibre, anti-UV and fine carborundum grit anti-slip surface.

Even in this idyllic location with glorious views the coastal environment is extremely harsh on most building materials. The challenge is to install products that will endure for decades yet have high anti-slip while still remaining comfortable for bare feet and safe against the risk of serious abrasions to young children who might run and fall over.

To meet these challenges, all Envirowalk FRP **EnviroMesh** and **EnviroTreads** are manufactured using only premium grade, unblended Type I (Iso) resin with ATH filler, maximum anti-UV, E-Glass fibres and fine grit P5 rated anti-slip surface.

This combination of raw materials is essential for outdoor applications – especially in a coastal environment.

Envirowalk PRODUCTS USED:

H40 (40mm thick) Mini-**EnviroMesh** Type I resin, 10g UV9, ATH filler, E-Glass fibres with fine carborundum barefoot friendly grit anti-slip surface.

H40 (40mm thick) Custom made Mini-Mesh **EnviroTread** Landing panels Type I resin, 10g UV9, ATH filler, E-Glass fibres with fine carborundum barefoot friendly grit anti-slip surface with pultruded angle anti-slip safety nosing bonded into leading edge
