

RESIDENTIAL DECKS

A LITTLE BIT OF IMAGINATION!!!

This home owner has created a visual masterpiece with **EnviroTread** Custom made panels and landings.

Using premium grade unblended Type I (Iso) resin, high anti-UV and fine, barefoot friendly grit anti-slip surface the aesthetic appearance should last for decades!!

It must be so great to relax in the living area and gaze out at the landscaped yard!

A Beautiful blend of contemporary & traditional!

This Private residential decking in the Coffs Harbour region is a wonderful tribute to the blend of FRP Mini-EnviroMesh, Timber & Stainless Steel wire rails.

The Charcoal Grey (Officially RAL Black Grey) blends perfectly with the forest surrounds – No wonder it is the preferred choice by the National Parks throughout the country and used in such places as Minnamurra Rainforest (Illawarra region) and Sea Acres Rain Forest (Port Macquarie)

All **Envirowalk** FRP **EnviroGrate** and **EnviroTreads** are manufactured using only premium grade, unblended Type I (Iso) resin with ATH filler, maximum anti-UV, E-Glass fibres and fine grit P5 rated anti-slip surface.

Envirowalk PRODUCTS USED:

H22 (22mm thick) Mini-Mesh with custom made **EnviroTread** step-down.

All with Type I resin, 10g UV9, ATH filler, E-Glass fibres with fine carborundum barefoot friendly grit anti-slip surface.
